Dear Supervisor Crispino:

Examiner Barbara Musser has been extremely helpful in examining my patent application, going above and beyond the call of duty. As a Pro Se applicant, I benefited from her help in rewriting the claims of my application Serial #10/691,351.

Examiner Musser is a straight-shooter who takes her work quite seriously. She not only improved my claims, but took the trouble to explain in words that I could understand why some of them could not be allowed. She is very professional, and conscientious -- working in her office on a weekend.

Examiner Musser is a credit to the U.S. Patent Office.

Sincerely,

A handwritten signature in black ink that appears to read "Mario Rabinowitz".
